19MEE347 Total Quality Management

Assignment 1

Question 1: Analyse the role of quality dimensions and quality costs in developing an effective Quality Planning framework for a manufacturing organisation. Illustrate how prevention, appraisal, internal failure, and external failure costs influence overall organisational performance.

Question 2: Analyse the factors affecting the successful implementation of Total Quality Management (TQM) in an organisation. Discuss the roles of leadership, quality council, quality statements, strategic planning, and Deming's philosophy, and identify the major barriers that may hinder TQM implementation.
