TQM END-SEMESTER STUDY PRIORITY TABLE

Unit-wise checklist · Priority is an evidence-based study estimate, not a guarantee of exam appearance.

Legend: VERY IMPORTANT = prepare thoroughly · MODERATELY IMPORTANT = prepare a solid answer · JUST READ = concise revision if time is limited

UNIT 1 — TQM FUNDAMENTALS

TOPIC NAME	PRIORITY	TYPE	
Definition of quality	JUST READ	Concept	
Dimensions of quality	VERY IMPORTANT	Concept	Pg 12 pg 20 pg 35
Quality planning	MODERATELY IMPORTANT	Concept	
Quality costs: prevention, appraisal, internal failure, external failure	VERY IMPORTANT	Concept + possible numerical	
Historical review of TQM	MODERATELY IMPORTANT	Concept	
Principles of TQM	MODERATELY IMPORTANT	Concept	
Leadership	VERY IMPORTANT	Concept	
Quality council	VERY IMPORTANT	Concept	
Quality statements (vision, mission, quality policy)	MODERATELY IMPORTANT	Concept	
Strategic planning	MODERATELY IMPORTANT	Concept	
Deming philosophy and 14 points	VERY IMPORTANT	Concept	
Barriers to TQM implementation	VERY IMPORTANT	Concept	
Three spheres of quality (classroom quiz)	MODERATELY IMPORTANT	Concept	

UNIT 2 — CUSTOMER, IMPROVEMENT AND QUALITY TOOLS

TOPIC NAME	PRIORITY	TYPE
Customer satisfaction	MODERATELY IMPORTANT	Concept
Customer retention	MODERATELY IMPORTANT	Concept
Employee involvement	JUST READ	Concept
Performance appraisal	JUST READ	Concept
Continuous process improvement / PDCA	MODERATELY IMPORTANT	Concept
Supplier partnership	JUST READ	Concept
Performance measures	JUST READ	Concept
Seven tools of quality	VERY IMPORTANT	Concept
Statistical fundamentals	VERY IMPORTANT	Concept + numerical foundation
Control charts for variables: X-bar and R charts	VERY IMPORTANT	Numerical
Control charts for attributes: p, np, c and u charts	VERY IMPORTANT	Numerical
Process capability: Cp and Cpk	VERY IMPORTANT	Numerical
Six Sigma and DPMO	MODERATELY IMPORTANT	Concept + possible numerical
New seven management tools	MODERATELY IMPORTANT	Concept
Benchmarking	MODERATELY IMPORTANT	Concept

UNIT 3 — QFD, TAGUCHI, TPM, FMEA AND QUALITY SYSTEMS

TOPIC NAME	PRIORITY	TYPE
Quality Function Deployment (QFD) / House of Quality	VERY IMPORTANT	Concept + possible weighted-score numerical
Taguchi Quality Loss Function	VERY IMPORTANT	Numerical + concept
Total Productive Maintenance (TPM): pillars and losses	VERY IMPORTANT	Concept
Overall Equipment Effectiveness (OEE)	MODERATELY IMPORTANT	Numerical + concept
Failure Mode and Effects Analysis (FMEA)	VERY IMPORTANT	Concept
FMEA Risk Priority Number (RPN)	VERY IMPORTANT	Numerical
Need for quality systems	JUST READ	Concept
ISO 9000:2000 and quality-system elements	MODERATELY IMPORTANT	Concept
Quality-system implementation	JUST READ	Concept
Documentation	JUST READ	Concept
Quality auditing	MODERATELY IMPORTANT	Concept
QS 9000	MODERATELY IMPORTANT	Concept
ISO 14000	MODERATELY IMPORTANT	Concept

Exam-practice reminder: Highest-priority numericals from your shared quiz and hints: X-bar/R charts, p-chart, process capability, Taguchi loss function and FMEA RPN. Numerical marks are counted within the relevant unit totals.

Evidence note: Control charts are directly represented in the classroom quiz; Deming and quality costs appear in the supplied assignment/quiz material; FMEA was explicitly highlighted in the class-group hint; Taguchi appears in Assignment 2. Other priorities are estimates based on the syllabus and earlier shared study material.
